Junior Software Developer| Web Developer

PROFESSIONAL SUMMARY:

Junior Software Developer with experience in full-stack web development, database optimization, and ERP-related systems. Experienced in remote work and collaboration with multidisciplinary teams. Focused on building efficient, scalable, and high-quality solutions.

WORK EXPERIENCE

Cofarsur – **PHP Developer (Symfony)**
May 2022 – May 2023 | Part-Time | Remote

› Developed and maintained full-stack web applications using PHP (Symfony), JavaScript, HTML, CSS and MySQL.
› Designed and implemented new features and modules based on business and user requirements.
› Refactored and fixed legacy code, improving system stability and maintainability
› Optimized database queries and application performance, reducing response times and improving user experience.
› Worked in an agile environment using Jira (Kanban) and Bitbucket, participating in code reviews and task planning.
› Collaborated with product and internal teams to deliver solutions for employees and external clients.
› Contributed to code quality improvements through refactoring and best practices.

Be Innovation Tech – **Programming Analyst**
March 2022 – April 2022

› Participated in the migration of data to a new ERP system.
› Analyzed and optimized complex SQL queries, reducing execution times from hours to seconds.
› Collaborated with the team to improve data reliability and system performance.
› Identified performance bottlenecks and proposed query optimization strategies

Grupo Serin – **Systems Analyst in the IT area**
Dec 2020 – March 2022

› Managed and maintained SQL Server databases (DDL, DML, DCL), supporting business critical systems.
› Created reports and data analysis using SQL Server Reporting Services (SSRS).
› Developed an internal Risk Management System (VB.NET) for the Quality area.
› Administered Microsoft Dynamics GP at a basic level, supporting users and business processes.
› Provided basic network administration using MikroTik (routing, configuration, and troubleshooting).
› Delivered N2 and N3 technical support across multiple business area.
› Organized development and support tasks using Kanban and ticket-based workflows.

• English: Professional working proficiency

Tech Skills

› PHP (Symfony), JavaScript, Java

› SQL Server, MySQL (DDL, DML, DCL)

› HTML, CSS, Bootstrap, Sass

› Git, GitHub, Bitbucket

› Jira, Kanban

› Microsoft Dynamics GP

› MikroTik

Education

› **Systems Engineering – IUA FCA (2018–2022) | 4/5 years completed**

› **JavaScript Course – CoderHouse (2021)**

› **PHP Course – IUA FCA (2020)**

Soft Skills

› Remote communication and collaboration

› Problem-solving mindset

› Continuous learning
